

CHOOLOWE CHEELO

Data Analyst • BSc Actuarial Science

Lusaka, Zambia • choolwecheelo22@gmail.com • +260 961 098 744 • [linkedin.com/in/choolwe-cheelo](https://www.linkedin.com/in/choolwe-cheelo) • ccheelo.github.io/portfolio-website

PROFESSIONAL SUMMARY

Actuarial Science graduate specialising in data analytics, financial analysis, and business intelligence. Microsoft Certified Power BI Data Analyst (PL-300, 950/1000), currently the Data Analyst at AB Bank Zambia, using Excel, Power BI, Qlik Sense, and SQL to build automated pipelines and dashboards that feed Executive and Board reporting. Grounded in financial reporting and quantitative analysis, with a track record of translating complex datasets into decisions stakeholders can act on. Chairs the bank's AI Committee, leading responsible adoption of AI-assisted workflows.

KEY SKILLS

BI & Analytics: Power BI (DAX, Power Query), Qlik Sense (Load Scripting, Incremental QVD Loads), Star-Schema Data Modelling, Dashboard Design & Data Storytelling, T-SQL / SQL Server (Complex Queries, Temporal Tables, SQL Server Agent Jobs), ETL Pipelines, Data Quality & Validation

Financial & Statistical: Financial Reporting, R (Portfolio Simulation, Time Series), Reconciliations, Risk Assessment, Trend Analysis, Statistical Bias Auditing, Hypothesis Testing, A/B Testing

Tools & Delivery: Excel (VBA, Power Pivot, Sensitivity Analysis), Power Automate, Project Lifecycle Management, Monitoring & Evaluation (M&E)

AI & Governance: Prompt Engineering, Loop Engineering, MCP (AI-Data Integration), AI-Assisted Analysis, AI Governance & Adoption

Agentic Coding: AI-Driven Development of Data Systems & Applications (Scoping & Architecture, Pipeline & ETL Build, Testing & Debugging, Deployment & Automation)

Soft Skills: Analytical Reasoning, High Attention to Detail, Executive & Board Stakeholder Reporting, Committee Leadership, Training & Facilitation

PROFESSIONAL EXPERIENCE

Data Analyst - AB Bank Zambia

Jun 2026 - Present

- Sole analyst for the bank, owning reporting and analytics across every business function, including the weekly and monthly Executive and Board of Directors reporting packs.
- Built nightly Qlik Sense dashboards fed by Power Automate pipelines, turning a full-day KYC audit into an at-a-glance view.
- Automated the back office's daily reconciliations in Power Query and VBA, cutting a 3-hour hand-matched process to minutes and removing human error.
- Designed and deployed SQL Server Agent monitoring in T-SQL that flags balance mismatches automatically, retiring manual reports run three times a day.
- Drafted the bank's 2026-2030 digital strategy, submitted to ExCo after multiple review rounds with senior management.
- Building three internal systems end to end through agentic coding: a customer chatbot, an account-opening quality assurance agent and a resource analytics app.
- Founding Chair of the bank's AI Committee, overseeing its establishment and the AI governance and audit framework, securing approval of the AI acceptable-use policy, and leading the initial AI rollout to 32 users.
- Designed and delivered AI and Excel training for 30+ staff, from C-suite executives and management to whole departments.

Data Analyst Trainee - Financial Services International Outsourcing

Feb 2026 - Jun 2026

- Designed interactive Power BI dashboards over financial and economic datasets, improving insight delivery for stakeholders.
- Built SQL and ETL pipelines to clean, validate, and prepare high-volume datasets for analysis.
- Performed exploratory analysis in Excel (VBA, Power Pivot) and Power BI to surface trends and anomalies, and designed and evaluated A/B tests.
- Applied AI-assisted workflows (Claude, prompt engineering, MCP) to accelerate analysis and automate repetitive tasks.
- Presented findings in client meetings and board-level presentations.

- Scanned and validated 3 million+ national exam answer cards per season for 475,000+ Grade 7 and 12 candidates, under tight pre-publication deadlines.
- Reconciled scanner output against candidate registers to trace and rescan missing scripts before publication, and in the second season trained new clerks and supervised night-shift scanning stations.

SELECTED PROJECTS

Account Opening QA Agent

- Developing an AI quality assurance agent in Python that checks scanned account-opening packs for missing documents, data mismatches and signature issues, running entirely on locally trained machine learning models so no client data leaves the bank.
- Document checks reach 96-100% accuracy on unseen packs, and 88% of handwritten fields are verified without manual review, with exceptions routed to human checkers with evidence.

UNISDA Strategic Planning & Reporting System

- Built a planning and reporting platform for University SDA Church, one of Zambia's largest Adventist congregations (2,000+ members), where all 36 departments plan activities against strategic KPIs and report with quarterly scoring.
- Built in a finance workflow that replaces paper forms and Excel workbooks, taking department budgets through approval and payment requests through a four-stage chain to disbursement and receipt; now rolling out, with department users in training after three rounds of user testing.

Resource Analytics Web App

- Built an analytics app that imports fuel-card, vehicle-tracking and print data, measures fuel and paper use against branch business growth, and produces a monthly Excel/PDF pack.
- Checks every fuel purchase against official ERB prices, breaks each month's change in spend into volume and price effects, and forecasts year-end fuel costs.

Customer Chatbot

- Developing the bank's customer chatbot in Python (FastAPI) with fraud, complaint and lead flows, automatic masking of personal data and Jira hand-off, plus a staff analytics dashboard tracking traffic, understanding, ticket speed and leads.

Zambezi Futures - Player Registration Platform

- Project-managed a cross-functional team to deliver a youth football tournament platform serving 300+ athletes, from gathering requirements with organisers through to launch and handover to the owners, who now run it independently.
- Delivered registration, player tracking and administrative reporting in one central system, replacing manual paper registration and improving data accuracy for organisers and parents.

Quantitative Finance Research in R - Copper Prices & LuSE Market Efficiency

- Forecast copper prices with ARMA models on weekly Bank of Zambia data, and tested the Lusaka Securities Exchange for weak-form market efficiency using autocorrelation and runs tests for hedging and investor decisions.

EDUCATION

The University of Zambia - Bachelor of Science in Actuarial Science

2022 - 2025

Relevant coursework: Risk Management, Financial Engineering, Time Series Analysis, Investment & Portfolio Management, Financial Reporting, Life & Health Insurance Mathematics, Pensions Design and Valuation.

CERTIFICATIONS

- Microsoft Power BI Data Analyst Associate (PL-300) - Microsoft, 2026; 950 / 1000
- Qlik Sense for Business Intelligence - Coursera, 2026
- AI Proficiency with Claude (Prompt Engineering, Claude Code) - Anthropic Academy, 2026
- R Programming - University of Zambia, CICT, 2025
- Statistics and Data Analysis with Excel - Macquarie University, 2026
- Business Statistics and Analysis - Rice University, 2026
- Project Management - University of Zambia, CICT, 2026
- Monitoring & Evaluation - University of Zambia, CICT, 2026
