

CHOOOLWE CHEELO

Data Analyst • BSc Actuarial Science

Lusaka, Zambia • choolwecheelo22@gmail.com • +260 961 098 744 • [linkedin.com/in/choolwe-cheelo](https://www.linkedin.com/in/choolwe-cheelo)

PROFESSIONAL SUMMARY

Actuarial Science graduate specializing in data analytics, financial analysis, and capital markets. Microsoft Certified Power BI Data Analyst (PL-300, 950/1000), currently a Data Analyst Trainee at FSI Outsourcing applying Excel, Power BI, and SQL to support data-driven decision-making over financial datasets. Academic project work covers investment and portfolio management, time series forecasting of copper prices, and weak-form efficiency testing on the Lusaka Securities Exchange. Proficient in AI-assisted workflows and grounded in translating complex datasets into decisions stakeholders can act on.

KEY SKILLS

Investment & Financial Analysis: Financial Modelling (Excel, VBA, Power Pivot, Sensitivity Analysis), Portfolio Analysis & Simulation (R), Time Series Forecasting (ARMA), Risk Assessment, Financial Reporting, Investment Research, Valuation Fundamentals, Capital Markets Analysis

Quantitative & Statistical: Hypothesis Testing, Autocorrelation & Runs Tests, A/B Testing, Trend Analysis, Uncertainty Assessment, Statistical Bias Auditing, Monte Carlo / Portfolio Simulation

Data & BI Tools: Power BI (DAX, Power Query, Data Modeling), SQL (Querying, Joins, Aggregations), R, Excel (Advanced), ETL Pipelines, Data Visualization & Storytelling

AI & Automation: Prompt Engineering, AI Fluency (Anthropic 4D Framework), Claude & Claude Code, MCP (AI-Data Integration), AI-Assisted Analysis & Workflow Automation

Professional: Analytical Reasoning, High Attention to Detail, Stakeholder Reporting, Clear Technical Communication, Collaborative Problem Solving, Adaptability

EDUCATION

The University of Zambia

2022 – 2025

Bachelor of Science in Actuarial Science

Final Year: Merit (3.61 / 5) • **Cumulative GPA:** 3.12 / 5

Relevant Coursework: Investment & Portfolio Management, Financial Engineering, Risk Management, Time Series Analysis, Financial Reporting, Life & Health Insurance Mathematics, Pensions Design and Valuation.

PROFESSIONAL EXPERIENCE

Data Analyst Trainee — Financial Services International Outsourcing

Feb 2026 – Present

- Build interactive Power BI dashboards over financial and economic datasets, including portfolio-style performance views, KPI tracking, and trend analysis to support stakeholder decision-making.
- Develop SQL and ETL pipelines to clean, validate, and prepare high-volume financial datasets — the same workflow used to feed financial models and investment research deliverables.
- Conduct exploratory data analysis using Excel (VBA, Power Pivot) and Power BI to identify trends, anomalies, and patterns across financial datasets, surfacing insights for client and board-level reporting.
- Apply AI-assisted workflows (Claude, prompt engineering, MCP) to accelerate analysis, automate repetitive modelling tasks, and shorten turnaround on research outputs.
- Translate analytical findings into clear written and visual insights, presenting outcomes in client meetings and board-level presentations.

Seasonal Clerk — Examinations Council of Zambia

Nov 2022 – Feb 2023; Nov 2023 – Feb 2024

- Scanned and validated answer cards for Zambia's national Grade 7 and Grade 12 examinations, processing ~3 million answer cards per season from a candidate pool of ~475,000 students.
- Cross-checked scanner output against candidate registers to trace and rescan missing scripts, ensuring complete and accurate results before publication — work demanding sustained attention to detail under deadline pressure.

- In the second season, trained new clerks and supervised scanning stations during night shifts, maintaining quality and pace across a small team.

SELECTED PROJECTS

Efficient Market Hypothesis Testing — Lusaka Securities Exchange

- Tested weak-form market efficiency on the LuSE using historical equity data, applying autocorrelation and runs tests to assess the random-walk hypothesis and informational efficiency of the Zambian capital market.
- Produced empirical findings relevant to investor strategy and regulatory understanding of price-discovery efficiency in frontier African capital markets, where EMH evidence is sparse.

Time Series Forecasting — Copper Price Modelling (R)

- Developed ARMA models to forecast copper prices using weekly Bank of Zambia data; conducted diagnostics and model selection using BIC and residual analysis.
- Demonstrated how commodity-price forecasts can inform hedging, fiscal planning, and investment positioning in a copper-dependent economy where commodity prices drive ~70% of national export revenue.

Climate Change Impact Analysis — Power BI Reporting

- Built an interactive Power BI report integrating global environmental datasets (temperature, water, forests, natural disasters) into a single visual narrative.
- Designed scenario comparison views illustrating the relative impact of different mitigation strategies — applicable framing for climate-finance investment screening and ESG reporting.

Statistical Bias Audit — University Admissions Data

- Analyzed large-scale administrative data using t-tests and chi-square testing to assess statistically significant group-level disparities, producing defensible, data-backed findings.
- Translated quantitative evidence into clear conclusions for policy review — methodology directly applicable to audit, compliance, and due-diligence contexts.

Soccer Tournament Hosting Web App — Project Manager

- Orchestrated the development lifecycle of a player registration web app serving 300+ youth athletes, managing cross-functional requirements end-to-end.
- Replaced manual registration with a centralized digital workflow, reducing administrative overhead and improving data accuracy for tournament organizers.

CERTIFICATIONS

- **Microsoft Power BI Data Analyst Associate (PL-300)** — Microsoft; 950 / 1000
- **Statistics and Data Analysis with Excel** — Macquarie University
- **Business Statistics and Analysis** — Rice University
- **AI Proficiency with Claude** — Anthropic Academy; multiple certifications in advanced AI usage, prompt engineering, and Claude Code
- **Mindware: Critical Thinking for the Information Age** — University of Michigan
- **Project Management** — University of Zambia, CICT
- **Monitoring & Evaluation** — University of Zambia, CICT
